EDUCATION

Columbia University

Master of Science in Computer Science Bridge Program, Software Systems (Planned)

New York, NY

Expected 2028

- **Relevant Coursework:** Data Structures & Algorithms, Fundamentals of Computer Systems, Analysis of Algorithms, Advanced Programming

The University of Texas at Austin

BBA, Major in Finance, Minor in Management Information Systems | GPA: 3.77

Austin, TX

May 2023

SKILLS

Programming Languages : Java, Python, C, SQL, JavaScript/TypeScript

Frameworks & Libraries : Next.js, React, React Native/Expo, Prisma ORM, Pydantic, Jackson, BeautifulSoup, WatermelonDB, Tailwind CSS

Tools & DevOps : Docker, Vercel, Git, GitHub Actions (CI/CD), Maven, PostgreSQL, Supabase, REST APIs

PROJECTS

ResyBot – Automated monitoring tool for hard-to-get restaurant reservations

Dec 2025 - Present

- Developed a Java application that polls restaurant availability via REST API integration, parsing JSON responses with Jackson to extract and filter open time slots by date, time range, and party size
- Containerized the application with a multi-stage Docker build and Maven dependency caching, deploying via Docker Compose with environment-variable-based configuration

LionTalk – Centralized hub for upcoming campus speaker events

Dec 2025 - Present

- Integrated the Google Gemini 2.5 Flash API with structured JSON schema validation via Pydantic models to extract and normalize unstructured HTML seminar data across heterogeneous website layouts, achieving 95%+ parsing accuracy
- Designed and shipped an automated CI/CD pipeline with GitHub Actions to run a reliable daily data-sync workflow, storing API credentials in GitHub Actions encrypted secrets to prevent key exposure

Calordle – Daily Wordle-inspired calorie guessing game

Feb 2026 - Present

- Engineered a daily puzzle web app in Next.js and TypeScript, deployed on Vercel, designing a REST API backed by Prisma ORM and PostgreSQL to serve a new restaurant food item each day with a +/-30-hour date window to support all global time zones
- Implemented a progressive hint system (too-high/too-low with directional indicators for guesses >25% off) and persisted guess state client-side via localStorage, with a native share-results feature on game completion

EXPERIENCE

Arena Investors

New York, NY

Senior Analyst - Corporate Private Investments

Aug 2024 - May 2025

- Closed a \$21M term loan secured by a managed print services provider by leading industry research, due diligence, financial modeling, and investment memo drafting for Arena's investment committee
- Originated and screened term loan opportunities across the aerospace, manufacturing, technology, and healthcare sectors as part of a specialized 3-person Corporate Private Investments team

Analyst - Real Estate Private Investments

Jul 2023 - Aug 2024

- Executed a \$14.6M sale of a 246-loan residential portfolio by consolidating a 900+ loan data tape into stratified performance tables (IRR, cost basis, unpaid balance) and authoring the investment memo
- Performed due diligence – including property valuations, loan document review, and market research – on short-term, high-yield first mortgages (\$3M-\$50M) as part of a four-person team
